PERSONAL STATEMENT:

My background as an AI Engineer, combined with my extensive experience in STEM education and project management, has equipped me with a unique and comprehensive skill set that I am eager to apply in an IT Technical support role. I have a strong foundation in a variety of technologies, including Windows, Mac OS, LAN, Linux, Microsoft 360, Google Workspace, Email configuration, Python, C++, and JavaScript, and I am proficient in using tools such as TeamViewer, AnyDesk, LogMein Rescue, Chrome remote desktop, Microsoft Quick assist, TensorFlow and OpenCV. My experience in data preprocessing and model evaluation has honed my analytical and problem-solving abilities, which are crucial for diagnosing and resolving technical issues efficiently.

Experience and Skills

In my previous roles, I've managed complex technical projects, troubleshot hardware and software issues, and guided users through challenging technical tasks. As a STEM Facilitator and Team Coach at various robotics competitions, I developed a knack for simplifying complex concepts and communicating them clearly to a diverse audience. This is directly applicable to an IT support role, where explaining technical solutions to non-technical users is a key part of the job.

I've also utilized my technical skills in a professional setting. During my time as a Vehicle Inspector/Sales Agent, I used advanced scanning technology to diagnose potential faults in vehicles. This experience gave me a practical understanding of how to leverage technology to identify and solve problems systematically, a core competency for any IT professional.

My commitment to continuous learning is evidenced by my Masters in Artificial Intelligence and Data Science, where I studied modules such as **Neuronal Analysis** and **Computer Vision**. This academic rigor, combined with my hands-on experience, ensures that I can quickly grasp new technologies and adapt to the ever-evolving IT landscape. My volunteer experience as a judge at the **FIRST UK Robotics Competition** further showcases my ability to evaluate technical performance and provide constructive feedback.

CORE SKILLS

Technical Support | Help Desk Support | Network Troubleshooting | Hardware and Software Diagnostics | System Administration | Data Backup and Recovery | Remote Assistance | Ticketing Systems | IT Security Awareness | Customer Service | Communication | Problem Analysis | Problem-Solving | Documentation | Project Management | Client Relations and Communication | Windows/macOS/Linux OS | Mobile Device Support | Mechanical Engineering | Data Science | Artificial Intelligence

TECHNOLOGIES

Python | C++ | JavaScript | SQL | HTML | CSS | Windows OS | macOS | Linux | Microsoft Office Suite | Google Workspace | Asana | Ticketing Systems (e.g., Jira, Zendesk) | Networking Protocols (TCP/IP) | Troubleshooting Tools | Cloud Services (e.g., AWS, Azure) | Virtual Machines | VPNs

VOLUNTEER WORK EXPERIENCE

Judge – FIRST UK
Judge - FIRST UK Robotics Competition
Bournemouth

25th April, 2025

As a Judge at the prestigious FIRST UK Robotics Competition, I played an essential role in evaluating the performance, creativity, and technical skills of competing teams. My responsibilities included assessing robot designs, reviewing team presentations, and ensuring fair scoring in accordance with competition guidelines. This position required a keen eye for detail, strong analytical skills, and the ability to provide constructive feedback to participants. Through this role, I contributed to fostering innovation, teamwork, and passion for STEM among students, while gaining insight into groundbreaking robotics solutions.

Data Entry - Enable My Trip **Nov 2023 – Till Date**

As a dedicated Volunteer Data Entry Specialist, I undertook a critical role in supporting the organization's data management initiatives. My primary responsibilities involved accurately entering and updating information within the organization's database system. This volunteer position provided a valuable opportunity to contribute to the operational efficiency of the organization while honing my data entry and organizational skills.

Team Coach – RoboRAVE Robotics Competition
Lagos, Nigeria

2018 – 2019

As a Team Coach at the RoboRAVE Robotics Competition in Lagos, Nigeria, I led and mentored a team of students, guiding them through the design, construction, and programming of their robots. My responsibilities included teaching foundational robotics principles, assisting with troubleshooting, and fostering teamwork and problem-solving among team members. I also provided strategic advice to help the team overcome technical challenges and excel in competitive tasks. This role allowed me to cultivate leadership and coaching skills while empowering students to explore STEM disciplines and achieve success in a dynamic, hands-on learning environment.

STEM Facilitator - Oyomesi Hackthon **June 2018**
Ibadan, Nigeria

Facilitation and training of secondary school students in coding, robotics and website design. Introducing them to the basic principles like algorithms, programming robots.

PAID WORK EXPERIENCE

SILVERSHELL INTEGRATED CONSULTING LTD | AI Integration Analyst / Project Associate
(2024 – 2025)

I was responsible for the technical deployment support, system documentation, and ensuring the operational stability of a major enterprise HR technology platform upgrade, which included the integration of new automation and predictive features. This initiative required strict adherence to technical compliance standards, detailed testing, and documentation to maintain a high level of system reliability and user function. The project was delivered within an Agile framework, necessitating close collaboration with engineering teams and end-users.

Key Responsibilities

- Technical Documentation & System Specs: Documented detailed business and technical requirements, developed precise user stories with acceptance criteria, and maintained all system/sprint artifacts using tools like Jira and Confluence to ensure a single source of truth for technical teams.
- System Testing & Quality Assurance: Oversaw functional testing, technical validation, and User Acceptance Testing (UAT) activities to rigorously confirm that all new system features met technical, functional, and compliance standards prior to deployment.

- Production Support Liaison: Acted as a key liaison between the development/data science teams and end-users (HR/Operations), translating complex technical issues and updates into clear, actionable information for non-technical stakeholders.
- Incident & Communication Management: Managed internal communications, technical reporting, and stakeholder updates to ensure awareness of deployment schedules, system status, and resolution progress across all project phases.
- Agile Process Support: Facilitated Agile ceremonies (sprint planning, backlog grooming, daily stand-ups) to ensure process adherence, track technical dependencies, and maintain transparency in the development and support pipeline.
- Cross-Functional Issue Resolution: Engaged with engineering and HR teams to quickly identify and troubleshoot integration pathways and system dependencies, ensuring minimal disruption to operational workflows.
- Process Improvement: Contributed to the continuous improvement of technical delivery and testing processes, focusing on standardizing documentation and increasing release quality.

Customer Care – McDonald's, United Kingdom | Sept 2023
As a Crew Member at McDonald's, I am dedicated to maintaining a clean and well-organized restaurant lobby. My responsibilities include ensuring customers have a positive experience and providing them with avenues for feedback.
Key Responsibilities:

- Ensured the restaurant lobby is cleaned and well maintained to create a welcoming environment.
- Assisted customers with their inquiries and provided exceptional service to enhance their dining experience.
- Facilitated customer feedback channels to address concerns and improve overall satisfaction.

CARS45, NIGERIA | VEHICLE INSPECTOR / SALES AGENT | April 2021 – January 2022
Cars45 is a company that specializes in buying and selling used cars in Nigeria. As a Vehicle Inspector/Sales Agent, I was responsible for ensuring the quality, authenticity, and compliance of vehicles brought in for sale while leveraging technology to enhance the inspection process.

Key Responsibilities:

- Conducted thorough vehicle inspections to assess quality, condition, and authenticity before sale.
- Reviewed and verified vehicle documentation to ensure compliance with legal and regulatory requirements.
- Utilized advanced scanning technology to detect potential faults, enhancing inspection accuracy and efficiency.
- Accurately documented and reported discrepancies, providing transparent insights for informed decision-making.
- Collaborated with the sales team to facilitate seamless vehicle transactions and optimize sales processes.

WAAW FOUNDATION, NIGERIA | STEM FACILITATOR | August 2019 – December 2019
WAAW (Working to Advance Science and Technology Education for African Women) Foundation is a non-profit organization committed to increasing the participation of African women and girls in STEM (Science, Technology, Engineering, and Mathematics). Through hands-on education, leadership development, and entrepreneurship training, WAAW Foundation equips young women with the skills needed to excel in STEM careers. The foundation runs coding camps, teacher training programs, and scholarship initiatives, fostering innovation and gender equality in STEM fields across Africa.

As a STEM Facilitator, I played a key role in empowering students and educators by delivering hands-on training sessions, designing innovative learning experiences, and mentoring STEM Fellows. I was actively involved in curriculum development, teacher training, and program impact assessment to ensure the effectiveness of STEM education initiatives.

Key Responsibilities:

• Facilitated STEM training programs, inspiring participants and fostering a passion for Science, Technology, Engineering, and Mathematics.

• Developed engaging lesson plans and implemented innovative teaching strategies to enhance learning experiences.

• Conducted teacher training sessions and research to improve STEM programs and events.

• Led program recruitment and onboarding efforts, ensuring a seamless integration of new participants.

• Mentored and managed a team of STEM Fellows, providing guidance and fostering professional growth.

• Compiled comprehensive reports to measure program impact and provide insights for continuous improvement.

DHACK INSTITUTE, NIGERIA | STEM FACILITATOR | March 2018 – March 2019
Dhack Institute provides hands-on STEM education to children aged 6–18, focusing on Coding, Robotics, and Web Design.

I was responsible for designing and delivering interactive training sessions that engaged students and helped them build practical knowledge in STEM subjects. I played a key role in adapting curricula to meet diverse learning needs, ensuring students received a comprehensive and enjoyable educational experience.

Key Responsibilities:

• Led interactive STEM training sessions, engaging students in Coding, Robotics, and Web Design.

• Designed and adapted curriculum to accommodate diverse learning styles, maximizing student engagement and retention.

• Utilized innovative teaching methodologies to make complex STEM concepts accessible and exciting.

• Generated detailed reports tracking student progress and program effectiveness, identifying areas for improvement.

INTERNATIONAL INSTITUTE OF TROPICAL AGRICULTURE (IITA), NIGERIA | MECHANICAL ENGINEERING INTERN | September 2015 – March 2016
IITA is a non-profit organization headquartered in Ibadan, Nigeria, dedicated to addressing the challenges of hunger, malnutrition, poverty, and natural resource degradation across sub-Saharan Africa. As a member of the CGIAR consortium, IITA collaborates with international and national partners to develop agricultural innovations that improve livelihoods, enhance food and nutrition security, increase employment, and preserve natural resource integrity.

I contributed to the maintenance and repair of workshop machinery, ensuring operational efficiency and safety. I was also responsible for engaging with clients and stakeholders, addressing inquiries, and assisting in the documentation of daily engineering activities.

Key Responsibilities:

• Performed maintenance, repair, and servicing of workshop machinery to ensure operational efficiency.

• Engaged with clients and stakeholders, addressing inquiries, complaints, and technical requests.

• Implemented and enforced workplace safety protocols, prioritizing employee well-being.

• Documented daily work reports, tracking maintenance activities and machinery performance.

EDUCATION

BOURNEMOUTH UNIVERSITY – BOURNEMOUTH, UK **SEPT 2023 – SEPT 2025**
MSc Artificial Intelligence and Data Science
Relevant Modules: Neuronal Analysis, Computer Vision, Search and Optimisation, Data Processing and Analytics, Artificial Intelligence

UNIVERSITY OF IBADAN – IBADAN, NIGERIA **SEPT 2013 - SEPT 2017**

BSc Mechanical Engineering
Relevant Modules: Strength of Materials, Thermodynamics, Mechanics, Algebra, Ordinary Differential Equations, Fluid Mechanics, Stress Analysis, Design of Machine Elements, Engineering Laws, Workshop Practice, Material Science

EDUCATIONAL ADVANCEMENT CENTRE (IBADAN, NIGERIA) **SEPT 2012 - JULY 2013** A-level program – Chemistry (A), Mathematics (B), Physics (B)

CLUBS AND SOCIETIES

- Member of Computing and Security Society Bournemouth University
- Roborave Team Coach

OTHER SKILLS AND INTERESTS

- **Skills** - Front-end Web Design – CSS, HTML, Javascript, Google Suites, Microsoft Office, Asana, Python, Matlab
- **Hobbies**: Writer (poems and short stories), Basketball, Reading
